Introduction	How to use this checklist
Site mobilization and safety setup are critical phases in construction projects, ensuring that the site is ready for work and that all safety measures are in place to protect workers and visitors. This process involves setting up temporary facilities, securing the site, and ensuring compliance with safety regulations. Proper inspection of these elements helps avoid potential hazards and project delays. Users can interact with this checklist by ticking off items, leaving comments, and exporting the completed report as a PDF or Excel file, secured with a unique QR code for authenticity.	1. Before starting, gather necessary tools and safety gear, and ensure site conditions are suitable for inspection. 2. Click the "Use this checklist" button to launch interactive mode online. 3. Tick each item online as you complete the inspection. 4. Add comments on individual items or the entire checklist for detailed records. 5. Click Share or Download to export your completed checklist as a PDF or Excel file. 6. Review and digitally sign the report, then distribute it to stakeholders. Use QR code authentication for secure sharing and record-keeping.
